Your Step Tracker

The Step Tracker assists you in staying focused on business activities that lead to volume. Step Tracker works on a point system. You should reach a minimum of 4 points each day. Points are directly connected to business building activities. For each new prospect you add to your list, you can give yourself 1 point. For each appointment you set, you can give yourself 2 points. For every presentation that you give that is 3 points. And for each customer or distributor you enroll you can give yourself 4 points.

Symbol translation: # COMP = # number completed
